**11<sup>th</sup> October 2017**  
10:00 am - 12:30 pm  
Fairmont the palm

**Register Now**

Entry Fee:

Non Member

**AED 250**

EEG Member

**AED 150**

University Students

**AED 75**

Speakers:

Saeed Al Abbar,  
Chairman - EGBC

Jon Woodhead  
Regional Assessment Manager  
DNV - GL

Emirates Global Aluminium  
(TBC)

More speakers in the pipeline

The urban built environment is responsible for most of the world's fossil fuel consumption and greenhouse gas emissions. Goal No.9 of the SDGs talks about developing quality, reliable, sustainable and resilient infrastructure, to support economic development and human well-being.

The 'five Ps' **People**, **Planet**, **Prosperity**, **Peace**, and **Partnership** - capture the broad scope of the sustainable development goals agenda. The 17 sustainable goals and 169 targets aim at tackling key systemic barriers to sustainable development such as environmental deterioration, unsustainable consumption and production patterns, inadequate infrastructure and lack of decent jobs among others. The upcoming panel discussion on 'Rethinking Infrastructure: 5Ps' will incorporate the most relevant solutions in tackling the development and progress in each of these 5 spheres in the UAE and how these can be managed to achieve the Sustainable Development Goals on a national level in line with UAE Vision 2021.
