

# Online Training GRI Standards for Sustainability Reporting

Around the world, thousands of organisations report annually to disclose their performance in environmental, social and governance areas. The most commonly used framework for sustainability reporting has been the GRI guidelines.

**Participants will be issued a certificate from GRI Headquarters in Netherlands.**

From Global Reporting Initiative comes, a set of standards for Sustainability Reporting!

The GRI Standards feature a modular structure with a uniform format and a clear reporting requirements. The Standards were developed and released by the Global Sustainability Standards Board (GSSB), which is GRI's dedicated standard-setting body.

Arabia CSR Network, a Certified Training Partner of GRI, since 2011 is conducting a **3 Day Training Course on the GRI Standards**. The accredited course content will be delivered through lectures, discussions, exercises and case studies. It will include the following segments:

- **Introduction and background**
- **Overview of the GRI Standards**
- **GRI Standards in detail**
- **Start your reporting process using the GRI Standards**
- **Additional resources**

The training is of immense value to organisations currently using the GRI guidelines to report non-financial performance or those that are preparing their sustainability reports. It is particularly beneficial to report writing teams, sustainability professionals, consultants, researchers and so on.
