

# Online Certified Training on Fundamentals of CSR & Sustainability

## About the Training

CSR and Sustainability have emerged as strategic priorities for organisations, leading them to find ways to realise the full potential that CSR offers as a strategic management tool. The Arabia CSR Network is organising this training to help the participants understand how CSR can contribute strategically to an organisation's comprehensive performance and learn more about opportunities and benefits that CSR presents by scoping out what corporate responsibility means for their entities.

The course has been designed to offer pedagogical content and real world examples using a combination of lecture, discussion and exercise.

## Who should attend?

The training would be very useful for a wide range of participants that are looking to build their understanding of CSR and Sustainability, and use this to enhance their own and organisational knowledge about how best to develop an effective CSR and Sustainability practice. The training will be suitable for CSR or any other team member tasked with Environmental, Social and Governance (ESG) responsibilities, as well as consultants, freelancers and researchers.

## Certificate of Attainment

This certified training comes with an added value; - participants have the opportunity to get a certificate of attainment of knowledge upon undergoing an assessment exercise at the end of the training.

**Training sessions will include various topics such as the definition of corporate social responsibility and their curriculum, and examples of implementation and reporting.**
